FINANCIAL AND COMMERCIAL.

TUESDAY, March 21-6 P. M. In commercial circles to-day a buoyant feeling prevalled and an active business was done. The wheat

market was firm, with transactions in seller's favor. Cotton opened sleady and became strong at a slight advance in prices. THE EXPORTS OF THE WERE.

The aggregate amount of exports (exclusive of specie) from the port of New York to foreign ports for the week ending March 21, 1871, was \$5,123,187. MONRY FOUR TO FIVE PER CENT.

The demand for money was more active, but bor rowers on the usual stock collaterals were fully supphed at five per cent. Where a good margin wa permitted the larger houses were accommodated in some instances at four per cent, which was also the general rate in call loans with pledge of governmen securities. Prime commercial paper was quoted 63

Foreign exchange was stendy, but dull, on the basis of 100% a 110 for prime bankers' sixty day sterling and 110% for sight bills, the business being light, owing to the postponement of the sailing of the steamer until Thursday. The exports for the past week, as above shown, ought to create a bette supply of commercial bills.

GOVERNMENTS DULL. The only department of Wall street affected by the news from Paris is the government bond market, which was dull and in some of the Issues a traction lower, in consequence of the inactivity of the Lon-don market, which shows considerable hesitation, as a result of the doings in France. British consols were only about steady, and the same remark would apply to our five-twenties, although the latter were, if anything, a triffe firmer than their English rivals. Wall street watches London rather than Paris. GOLD STEADY-III A 111%.

The gold market was steady and strong; but its firmness was due more to the continued high rates for exchange than to any apprenen stons connected with the effect upon our finances of the present situation of affairs in France. At the same time any tendency to decline under a n anticipation of a coup d'é at on the part of the Freasury Department next month was held in check by estimates of a large specie shipment on Thursday, the amount rumored to be engaged so far exceeding a million dollars. The steamer to-day took only \$15,000. The prevailing sentiment of the Gold Room is, however, in favor of lower prices, as indicated by the unusual demand for cash gold from day to day to extend speculative contracts, a large proportion of the loans to-day having been made a "dat"-that is, free of interest on the currency collateral advanced by the berrower in return for the gold with which to make his deliveries. The lowest price was 111, with most of the sales at 111%. The highest figure, which was almost nominal,

STOCKS STRONG AND HIGHER. The stock market was strong and higher. Except in a few instances the "buil" cliques manifester no disposition to suddenly raise prices, but seemed to pursue the tactics of keeping the market strong. while absorbing such stock as their adversarie ventured to offer, on the theory of lower prices to succeed an active money market in the vicinity of April 1. In some instances they pushed prices slightly upward, as it to prevent any covering on the part of the "shorts," except at a loss. A sporting man would describe the present situation by saying that the "bulls" have the bears" "in chancery," and are so holding them until after the 1st of April, when the relaxation to follow the cessation of the flow of money to the For export and the constant of the now of money follow the cessation of the now of money of the fancies, such as the quicksilver, gold and coal mining shares, whose holders show some trepidation in anticipation of stringent money before the "April settlements" are through with. The railways were especially firm and generally higher. The Northwests rose to 83 for the common as against 75% in the morning, and to 94% for the preferred. Union Pacific went off at 24%, but railied to 25% on the report that some sort of an entertie cordiate had been established with the respectation for the property of the supply of present requirements. Speculation was attracted to future deliveries. The sales were:
